Community Health

How We Do This

Reach the
most
disadvantaged

We prioritise health care access and community support to people who need it most

Relationship
based

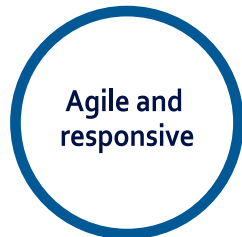

We build relationships and connections across lifetimes and generations. We work with the complexity in people's lives

Strong
community
connection

We engage and support people on their terms, in their homes, in the community and where they feel safe and respected

Agile and
responsive

With our partners, we find a way to innovate to address the social determinants of health and community capability

Upstream
Investment

We target the root causes of health inequities to reduce the social and economic pressure on people, communities and government

Clinical
Capabilities

We provide high quality primary care and multi-disciplinary clinical services in the community, with robust clinical governance. We care for people when and where they need it and have the expertise to keep Victorians healthy and out of emergency departments.

Community Health

Strategic Priorities

ARRCH works with community and partners across the Social Determinants of Health to:

Implement CP@team	Raise the profile of ARRCH and investment in rural and regional community health	Co-design and embed alternative primary care practitioner models	Demonstrate community health's impact and return on investment
Stand-up a permanent community resilience and recovery program	Lead community health promotion approaches at scale	Introduce mental health and primary health care models in schools	Continue to strengthen and sustain a contemporary community health platform
Support ageing in the community	Increase the health trajectory of children in rural and regional Victoria	Keep those living with chronic disease active and connected	Contribute to the rural and regional health equity evidence base
Support the health and well-being of those living on the land	Advocate for health equity for women and girls	Support health at home	Build new partnerships to increase collective impact
